

Advanced communication capabilities with Irrigation Manager™ Software and the CS3500, now stay connected anywhere.

ACC-ETN-007

The Ethernet/WLAN Adapter works with the Acclima Irrigation Manager™ Software to allow access to a CS3500 SMART controller through the internet. Configure the internet adapter to work on your Local Area Network, or expose it through your firewall to allow access to your CS3500 through the internet from virtually anywhere in the world.

The Acclima Ethernet adapter bridges the gap between the CS3500 and the internet enabling online monitoring and control of your irrigation system anywhere in the world. Your irrigation system, logged data, and device configurations are securely accessible anywhere. More reliable than a modem connection, the Ethernet adapter enables unlimited access to Irrigation Manager™ and your irrigation system.

Features:

- Works with Acclima Irrigation Manager™ Software
- Supports 802.11b/g Wireless LAN or hard-wired Ethernet connectivity
- Use Irrigation Manager™ Software to configure adapter to use DHCP or statically assigned IP address
- Features 2 serial ports to allow pass-through control to the CS3500 Controller
- Works with existing Routers/LAN configurations

Requirements:

- Works with Acclima CS3500 Smart Irrigation Controllers
- Requires Irrigation Manager™ Software 1.4.1.2 or greater (Acclima Irrigation Manager™ requires Microsoft Windows 98, 2000, XP or Vista Operating System)
- LAN with Ethernet port or 802.11b/g WiFi capability
